Excellence
in Concrete Construction Awards

The Excellence in Concrete Construction Awards honors exceptional concrete construction from around the world. Projects are recognized for the degree of innovation, complexity, achievement, and value that concrete as a material provided. Each year, the American Concrete Institute calls upon its global network of chapters, International Partners, and concrete professionals to nominate projects in seven categories. The winning projects are recognized at the annual ACI Excellence in Concrete Construction Awards on Monday night during the Fall ACI Concrete Convention.

The awards presentation highlights project details through short videos that accompany the presentation of each award. The evening concludes with the presentation of the “Overall Excellence” award.

Position your organization as a leader in the industry, celebrate your projects or project winners, and highlight your commitment to advancing and sharing knowledge. Through these sponsor packages, you will have the opportunity to receive recognition at the Awards Gala, advertising opportunities in *Concrete International* magazine, pre- and post-event marketing, priority seating at the Awards, and more. ACI Concrete Convention attendees represent decision-makers and influential members of the concrete construction industry.
